## MANAGEMENT DISCUSSION AND ANALYSIS REPORT

### Industry Structure and Development

The spinning industry is continuously expanding in South Asia and China in the last few years and is becoming growth engine of these economics.

At present the contribution of the Indian Textile Industry to its GDP is about 4.8%. Role of Textile Industry in India GDP has been quite beneficial in the economic life of the country. The worldwide trade of textiles and clothing has boosted up the GDP of India to a great extent as this sector has brought in a huge amount of revenue in the country.

India's textile industry is one of the leading textile industries in the world, exporting to over 100 countries. It contributes a significant 17 percent to India's overall export earnings and employs over 35 million people directly, making it the second largest source of employment after agriculture

After the removal of quotas by European Union in 2005 and because of Textile Upgradation Fund (TUF) interest subsidy, huge capacity expansions have taken place in Textile Industry in India.

The government has set the target for textile exports in the 2014-15 financial year at US\$60 billion. Policies of Government of India provides opportunities for the Indian Textile Export during the financial year 2014-2015.

### Outlook

The outlook for Textile Industry in India is optimistic. It is expected that Indian Textile Industry would continue to grow at an impressive rate. The fundamental strength of this industry flows from its strong production base of wide range of fibres/ yarns from natural fibres like cotton, jute, silk and wool to synthetic / man-made fibres like polyester, viscose, nylon and acrylic. In fact, apart from China, no other country can boast of such strong and diverse base in textile fibres/ yarns. The complex and varied structure of industry coupled with India's close linkage with culture and multi-fibre raw material base enables it to produce variety of products for varying consumer needs and preferences. The growth pattern of the Indian Textile Industry in the last decade has been considerably more than the previous decades, primarily on account of liberalization of trade and economic policies initiated by the Indian Government in the 1990s.

The inherent strengths of the Textile Industry have seen the Textile Industry through rough days and hard times. There have been many periods of adversity, when growth charts have dipped and it has appeared that misfortune will overtake. But like phoenix, the Textile Industry has risen each time from the ashes.

### Risk & Concerns

High volatility of cotton, yarn prices, rupee exchange rate, high attrition and shortage of work force are the major concerns for us. In order to mitigate the above risks, we have been taking several initiatives like lowering inventory levels, reducing manpower requirement by modernization of machines, application of autonomous maintenance philosophy, rationalization of workforce, Employee training and development, etc.

**Internal Controls**

There is proper and adequate system of Internal Controls to ensure that all assets are safeguarded and protected against loss from unauthorized use or disposition and that all transactions are authorized recorded and reported correctly. The internal control systems are supplemented by Internal Audits and review of the same by Audit Committee at corporate level.

**Acknowledgement**

Your Directors are pleased to place on record their sincere gratitude to the Government, Financial Institutions, Bankers and Business Constituents for their continued and valuable co-operation and support to the Company. They also take this opportunity to express their deep appreciation for the devoted and sincere services rendered by the employees at all levels of the operations of the Company during the year.

## NOTES TO FINANCIAL STATEMENTS

### 1. Significant Accounting Policies

1.1 Accounting Convention: The financial statements of the company are prepared under the historical cost convention on an accrual basis in accordance with the Generally Accepted Accounting Policies (GAAP) to comply with the Accounting Standards notified by the Government of India/issued by the Institute of Chartered Accountants of India (ICAI), as applicable and the relevant provisions of the Companies Act, 1956.

The accounting policies adopted in the preparation of financial statements are consistent with those of the previous years.

### 1.2 An asset has been classified as current when it satisfies any of the following criteria:

- a. It is expected to be realized in, or is intended for sale or consumption in the companies normal operating cycle;
- b. It is held primarily for the purpose of being traded.
- c. It is expected to be realized within 12 months after the reporting date.; or
- d. It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

A liability has been classified as current when it satisfies any of the following criteria:

- a. It is expected to be settled in the Companies normal operating cycle;
- b. It is held primarily for the purpose of being traded;
- c. It is due to be settled within 12 months after the operating cycle; or
- d. The company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of the liability that could at the option of counter party result in its settlement by the issue of equity instruments do not affect its classification.

All other assets and liabilities have been classified as non-current.

### 1.3 Use of Estimates :

The preparation of Financial Statements in conformity with Indian GAAP requires the management to make estimates and assumptions considered in the reported amounts of assets and Liabilities (Including Contingent Liabilities) as of the date of the financial statements and the reported income and expenses like provision for employee benefit, provision for doubtful trade receivables/ advances/ contingencies, provision for warranties, allowance for slow/ non-moving inventories, useful life of fixed assets, provision for taxation, etc., during the reporting year. The management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Future results may vary from these estimates.

### 1.4 Tangible Fixed Assets:

Fixed assets are stated at historical cost less accumulated depreciation and impairment losses, if any. Cost includes related taxes, duties, freight, etc. attributable to the acquisition and installation of the fixed assets but excludes duties and taxes that are recoverable from tax authorities. Borrowing costs are capitalised as part of qualifying fixed assets. Exchange differences arising on restatement/ settlement of long term foreign currency borrowings relating to acquisition of depreciable fixed assets are recognised in the statement of profit and loss.

Machinery spares which can be used only in connection with an item of fixed asset and whose use is expected to be irregular are capitalised and depreciated over the useful life of the principal item of the relevant assets. Subsequent expenditure relating to fixed assets is capitalised only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Fixed assets retired from active use and held for sale are stated at the lower of their net book value and net realisable value and are disclosed separately in the balance sheet

Capital work in progress: projects under which assets are not ready for their intended use and other capital work in progress are carried at cost, comprising direct cost and attributable interest.

#### **1.5 Impairment of Assets:**

The carrying values of assets/ cash generating units are reviewed at each balance sheet date to determine whether there is any indication of impairment of the carrying amount of the company's assets. If any indication exists, an asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of the asset exceeds the recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased such reversal of impairment loss is recognised in the statement of profit and loss.

#### **1.6 Investments:**

- a) Investments, which are readily realisable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as non current investments.
- b) Non-Current investments are carried at cost. Diminution in the value of such investments, other than temporary, is provided for.
- c) Current investments are carried at lower of cost and fair value.

#### **1.7 Inventories:**

- a) Raw materials, stores & spare parts and traded goods are valued at lower of weighted average cost (net of allowances) and estimated net realisable value. Cost includes freight, taxes and duties and is net of credit under VAT and CENVAT scheme, Where applicable.
